WARREN SHEETS DESIGN, INC.

A full-service interior design and interior architectural firm, Warren Sheets Design (WSD) is overseen by Warren Sheets, a visionary designer known for his meticulous, hands-on approach.

Over the last 30 years, WSD has successfully accrued a diverse portfolio of residential and commercial projects located across the country with a wide range of design styles – from traditional to contemporary.

With extensive experience and training, Sheets and his staff work from an expansive downtown San Francisco studio fully stocked with design resources and materials. Both he and his business partner Sharon Regan have earned the company a stellar reputation, and they are on a continual quest for fresh and innovative concepts.

WSD specializes in new-build construction and remodels, designing many projects from start to finish. They take on projects of all scopes and sizes. “We’ve worked on homes as large as 20,000 square feet, and as small as 2,000 square feet,” he says. “It isn’t the budget or the size that gets us excited about a project, but the ability to help create a life story for someone – that’s the essence of what we do.”

The end result? Well-designed, masterful interiors tailored to reflect each client’s distinct lifestyle and personality.
